ANTHERA Systems

CLASSIFICATION

Confidential

European data deserves European AI.

GOVERN.AI is the compliance-first AI control plane for enterprises operating in highly regulated industries. Built in Europe, powered by Sovereign European AI.

The Opportunity

As AI adoption accelerates across banking, insurance, healthcare, and public administration, organizations face a critical challenge: **deploy AI agents at scale while maintaining regulatory compliance, auditability, and control — and objectively measure compliance posture.**

GOVERN.AI provides a centralized governance layer with a **deterministic, explainable scoring engine** that quantifies compliance posture in real time.

What We Do (MVP v3.1)

Capability	Description
Compliance Intelligence Engine	Deterministic scoring for agents, standards and overall governance with native explainability.
Intelligence Center	Investor-ready dashboard: score ring, ranking, KPI breakdown, insights and remediations.
Policy Engine + Conflict Detection	Granular rules with automated detection (action conflicts, gaps, overlaps, redundancies).
Policy Guidance Engine	Operational guidance per conflict, documented resolution, full audit log.
SOX Section 404 Wizard	Guided internal control assessment with Audit Readiness Score.
Compliance Monitor	Real-time tracking against 8 standards (EU AI Act, GDPR, ISO 27001/42001, DORA, NIS2, SOX, D.Lgs. 262).
AI Assistant (ARIA)	LLM-powered advisor with SSE streaming, contextualized on score and open conflicts.

Sovereign AI — A Strategic Differentiator

GOVERN.AI v3.1 integrates Apertus (developed by ETH Zurich, EPFL and CSCS — Swiss National Supercomputing Centre) as its sovereign European AI provider. European data is processed by European AI, under Apache 2.0 license, outside US Cloud Act jurisdiction.

Feature	Value
Apache 2.0	Open-source, no vendor lock-in, free for commercial use.
EU/CH sovereign	Trained on the Alps supercomputer (Lugano), hosted in EU/CH.
EU AI Act ready	Article 13/53 transparency requirements satisfied by design.
Automatic fallback	Should sovereign provider fail, GPT-4o ensures business continuity.

Platform Highlights

Metric	Value
Regulatory Standards	8 (EU AI Act, GDPR, ISO 27001, ISO 42001, DORA, NIS2, SOX, D.Lgs. 262)
SOX Controls Tracked	20 across 5 domains
Policy Conflict Types	4 (action conflict, gap, overlap, redundancy)
Audit Logs (demo)	150+ across 7 realistic incident clusters
RBAC	4 roles (Admin, DPO, Auditor, Viewer)
Backend Tests	50 / 50
REST + SSE Endpoints	45+
UI Pages	13 (incl. Settings v3.1)
AI Provider	Apertus 70B (sovereign) + GPT-4o (fallback)
Languages	Italiano, English

Market Timing

- EU AI Act enforcement 2025-2026 — fines up to **35M EUR or 7% global revenue**.
- Enterprises deploying AI agents at unprecedented speed.
- SOX compliance increasingly requires AI governance controls.
- No incumbent solution offers AI governance with deterministic scoring AND sovereign EU AI.
- Investors and boards demand quantitative KPIs on AI compliance posture.

Target Market

Segment	Regulatory Drivers
Banks & Financial Services	EU AI Act + DORA + SOX + D.Lgs. 262
Public Administration	EU AI Act + GDPR + transparency
Insurance	EU AI Act + GDPR + DORA
Healthcare	EU AI Act + GDPR + highest scrutiny
Critical Infrastructure	NIS2 + EU AI Act

Business Model

B2B SaaS with tiered pricing aligned to AI agent volume and regulated industry usage.

Tier	Target	Pricing / year
Pro	Mid-market, up to 10 agents	12,000 EUR
Business	Up to 50 agents	48,000 EUR
Enterprise	Unlimited agents	100,000+ EUR

Competitive Landscape

Category	Players	Our Differentiation
Traditional GRC	ServiceNow, Archer, OneTrust	Not AI-native, retrofitting compliance.
AI MLOps	MLflow, Weights & Biases	Technical focus, no governance layer.
AI Security	Robust Intelligence, Protect AI	Security-focused, not compliance-first.
GOVERN.AI	—	Purpose-built for AI governance + 8 standards + deterministic scoring + sovereign EU AI.

The Ask

- Expand the product — enterprise connectors, multi-tenancy, auto-fix engine, real-time monitoring.
- Hire initial team — 2-3 engineers, 1 compliance domain expert.
- Pilot with design partners — 3-5 enterprises in banking and PA.
- Go-to-market in Italy and EU — first-mover on AI Act compliance.

About the Founder

Angelo Anglani is building GOVERN.AI with the vision of becoming the standard for AI governance in regulated industries.

Area	Experience
Cloud & Infrastructure	Managed 18,000+ AWS VMs for Italy's largest PA, 3M+ EUR annual savings, 99.9% SLA.
Enterprise Consulting	BIP xTech, Deloitte Risk Advisory — led 10M+ EUR programs.
IT Risk & Compliance	IT Audit, cybersecurity advisory, zero compliance violations.
Financial Communications	Master in Investor Relations (Euronext Academy / Borsa Italiana).

Education

- M.Sc. Data & Cloud Engineering — Politecnico di Milano (2023-2025)
- Master in Investor Relations — Euronext Academy, Borsa Italiana (2025)
- M.Sc. Industrial Management — LIUC Università Cattaneo
- AWS Cloud Practitioner certified
- HPC & Quantum Computing — CINECA
