

GOVERN.AI

The Sovereign Control Plane for Enterprise AI

EXECUTIVE INTRODUCTION

Versione: MVP 3.0

Data: 14 Maggio 2026

Autore: ANTHERA Systems

The Opportunity

GOVERN.AI is the compliance-first AI control plane for enterprises operating in highly regulated industries. It provides a centralized governance layer for AI agents, workflows, and models.

What We Do (MVP v3.0)

- **Compliance Intelligence Engine:** Deterministic scoring (0-100) for agents, standards and overall governance with native explainability
- **Intelligence Center:** Investor-ready dashboard - score ring, ranking, KPI breakdown, insights, remediations
- **Policy Engine + Conflict Detection:** Automated detection of action conflicts, gaps, overlaps, redundancies
- **Policy Guidance Engine:** Contextual operational guidance per conflict + documented resolution with audit log
- **SOX Section 404 Wizard:** Guided internal control assessment with Audit Readiness Score
- **Audit Trail:** Complete traceability with PDF/CSV export
- **Compliance Monitor:** Real-time tracking against 8 standards (EU AI Act, GDPR, ISO 27001/42001, DORA, NIS2, SOX, D.Lgs. 262)
- **Risk Classification:** Aligned with EU AI Act categories
- **AI Assistant (ARIA):** LLM-powered advisor with SSE streaming, contextualized on score and conflicts

Platform Highlights

Metric	Value
Regulatory Standards	8 (EU AI Act, GDPR, ISO 27001, ISO 42001, DORA, NIS2, SOX, D.Lgs. 262)
SOX Controls Tracked	20 across 5 domains
Policy Conflict Types	4 (action conflict, gap, overlap, redundancy)
Audit Logs (demo)	150+ with 7 realistic incident clusters
RBAC Roles	4 (Admin, DPO, Auditor, Viewer)
Backend Tests	50/50 passing
REST + SSE Endpoints	45+
UI Pages	12 (including Intelligence Center)
Languages	2 (Italian, English)

Use Case: Bank — AI Credit Scoring

A major Italian bank deploys AI for automated credit scoring (high-risk under EU AI Act). GOVERN.AI provides: risk classification, GDPR policy enforcement, SOX 404 internal control assessment with Audit Readiness Score, policy conflict detection, and complete audit trail with PDF export.

Use Case: Public Administration — AI Chatbot

A regional government deploys an AI chatbot for citizen services. GOVERN.AI enforces transparency policies, restricts access to confidential data, monitors 8 compliance standards in real-time, and provides D.Lgs. 262/2005 controls for financial operations.

Market Timing

- EU AI Act enforcement 2025-2026 — fines up to 35M EUR or 7% global revenue
- SOX compliance increasingly requires AI governance controls
- No incumbent solution addresses AI governance specifically
- Regulatory convergence: AI Act + DORA + NIS2 + SOX creates unique compliance matrix

Business Model

Tier	Target	Pricing
Pro	Up to 10 agents	12,000 EUR/year
Business	Up to 50 agents	48,000 EUR/year
Enterprise	Unlimited	100,000+ EUR/year

The Ask

- Expand product — enterprise integrations, multi-tenancy, auto-fix engine
- Hire initial team — 2-3 engineers, 1 compliance domain expert
- Pilot with design partners — 3-5 enterprises in banking/PA
- Go-to-market Italy/EU — first-mover advantage on AI Act compliance

About the Founder

Angelo Anglani — Founder, GOVERN.AI

Area	Experience
Cloud & Infrastructure	18,000+ AWS VMs, 3M+ EUR savings, 99.9% SLA
Enterprise Consulting	BIP xTech, Deloitte Risk Advisory — 10M+ EUR programs
IT Risk & Compliance	IT Audit, cybersecurity advisory, zero violations
Financial Comms	Master Investor Relations (Euronext/Borsa Italiana)
